DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species II, i.e., Claims 36-38 in the reply filed on 7/25/2007 is acknowledged.
2. Claim 35 link(s) Species 1 and Species II. The restriction requirement between the linked inventions is **subject to** the nonallowance of the linking claim(s), claims 35, 37 and 38. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions **shall** be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 **Claims that require all the limitations of an allowable linking claim** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 36 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The applicant discloses, "rotating said spindle **whilst keeping moving** the elongate medicament carrier in a lateral sense." What does keeping moving mean?

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 36 is rejected under 35 U.S.C. 102(e) as being anticipated by Harvey et al. (USP 7,231,920)

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome

either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claim 36, Harvey et al. disclose a method of coiling a medicament carrier, said carrier having the form of an elongate strip and having multiple distinct medicament doses carried thereby, the method comprising:

- (a) receiving the leading end of the elongate medicament carrier by a spindle (212);
- (b) rotating said spindle whilst keeping moving the elongate medicament carrier in a lateral sense (see Figures 1-5).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 36 is rejected under 35 U.S.C. 102(b) as being anticipated by De La Huerga (USPGPUB 2001/0028308).

Regarding claim 36, De La Huerga disclose a method of coiling a medicament carrier, said carrier having the form of an elongate strip and having multiple distinct medicament doses carried thereby, the method comprising:

- (a) receiving the leading end of the elongate medicament carrier by a spindle (570);
- (b) rotating said spindle whilst keeping moving the elongate medicament carrier in a lateral sense (see Figure 20).

Conclusion

Art Unit: 3651
